

AI Assignment: Generate MCQs (with options and answers)...

1. 1. Which property is NOT part of the CSS Box Model? A) Padding B) Border C) Margin D) Font-size (Correct Answer - The font-size does not belong to box model; it belongs to typography in CSS.)
 2. 2. In Flexbox, which property is used to align flex items horizontally? A) justify-content B) align-items C) margin (Correct Answer - The 'justify-content' property is used for horizontal alignment of flex items; the correct answer should be D) Align content.)
 3. 3. Which CSS selector targets an element with a specific id? A) #idname (Correct Answer - '#idname' will select only one HTML element that has this ID attribute in its tag.)
 4. 4. In Grid Layout, which property is used to define the size of grid items and their gaps between them? A) display: flex; B) justify-content: center (Correct Answer - The 'justify-content' does not apply here as it relates to alignment in Flexbox. Instead, we use properties like 'grid-template-columns', and 'gap'. Correct answer should be D) grid-template-areas.)
 5. 5. Which property is used for creating animations in CSS? A) animation (Correct Answer - The '@keyframes' rule along with the 'animation' shorthand are typically used to create animations in CSS.)
