

Assignment - HTML

Course ID: 6958fbd19ce8510d1a67c373

Generated: 1/3/2026

Due Date: 1/10/2026

Questions: 5

Type: DESCRIPTIVE

DESCRIPTIVE QUESTIONS (10 Questions):

Here are 5 descriptive questions about creating an assignment that focuses on describing HTML:

1. What specific criteria will you establish for students to ensure their responses are truly "descriptive" rather than merely listing HTML tags and attributes, encouraging them to elaborate on purpose, context, and practical application?
2. Beyond basic syntax, what kind of advanced or conceptual HTML topics (e.g., semantic HTML, accessibility features, responsive design principles via HTML) would you include in the assignment to challenge students to provide deeper, more nuanced descriptions?
3. What kind of open-ended prompt or scenario-based questions will you design for the assignment to encourage students to articulate their understanding of HTML's role in real-world web development, rather than just defining terms?
4. Describe the rubric you would create to evaluate the quality of students' descriptive explanations, particularly focusing on elements like clarity, accuracy, depth of understanding, and the effective use of examples or analogies.
5. What overarching learning objective do you aim for students to achieve through this descriptive assignment that goes beyond rote memorization, encouraging them to truly comprehend and articulate the 'why' and 'how' of HTML's structure and function?
