

Assignment - HTML

Course ID: 695e5bbdd6fb6a52bcd99f82

Generated: 1/7/2026

Due Date: 1/14/2026

Questions: 5

Type: DESCRIPTIVE

DESCRIPTIVE QUESTIONS (10 Questions):

1. What is the historical development and significance of HTML in the field of web development? Provide a detailed account of how HTML has evolved over time, highlighting major milestones and versions, and explain how it has shaped the way we interact with the internet today.
2. Explain the structure and syntax of an HTML document. Describe the different types of tags, their uses, and the importance of proper nesting. Additionally, explain the role of attributes within HTML tags.
3. Discuss the concept of semantic HTML. Why is it important and how does it contribute to the accessibility and SEO of a webpage? Share examples of semantically correct and incorrect HTML code.
4. How are forms created in HTML and how do they function? Discuss in detail the different form elements and their attributes, explaining how they aid in collecting and submitting user data.
5. What is the role of HTML in responsive web design? Discuss how HTML can be used in conjunction with CSS and JavaScript to create web pages that adapt to different screen sizes and devices, using code samples to illustrate your points.
