

Assignment - HTML

Course ID: 695e8805f3a2d3d9332b4307

Generated: 1/7/2026

Due Date: 1/14/2026

Questions: 5

Type: DESCRIPTIVE

DESCRIPTIVE QUESTIONS (10 Questions):

1. How does HTML (Hypertext Markup Language) play a crucial role in web development, and what are its primary functions in creating web pages?
2. Describe the basic structure of an HTML document, including the essential elements such as <html>, <head>, <title>, and <body>, and explain their significance in webpage creation.
3. What are the different types of HTML tags and how are they used to format content on a webpage? Provide examples of at least three commonly used HTML tags and explain their purposes.
4. Discuss the concept of semantic HTML and its importance in enhancing the accessibility and search engine optimization (SEO) of a website. Provide examples of semantic elements and explain how they differ from non-semantic elements.
5. How can CSS (Cascading Style Sheets) be integrated with HTML to enhance the visual presentation and layout of a webpage? Explain the relationship between HTML and CSS in web design and provide an example of applying CSS styles to HTML elements.
