

Assignment - AI

Course: 696a41301bc34b738be44fa4

| Due Date: 1/23/2026

Questions: 5 | Total Marks: 50

Type: Descriptive Questions

QUESTIONS:

Q1. Explain the concept of machine learning in the context of AI. Provide examples of machine learning applications.

[10 Marks | Difficulty: medium]

Expected Points:

- Definition of machine learning
- Explanation of how machine learning is used in AI
- Examples of machine learning applications in AI

Q2. Discuss the difference between narrow AI and general AI. Provide examples to illustrate each type.

[10 Marks | Difficulty: medium]

Expected Points:

- Definition of narrow AI and general AI
- Key distinctions between narrow AI and general AI
- Examples of narrow AI applications
- Examples of general AI applications

Q3. Examine the ethical considerations surrounding the use of AI technologies. Discuss potential risks and benefits.

[10 Marks | Difficulty: medium]

Expected Points:

- Explanation of ethical considerations in AI
- Identification of potential risks associated with AI technologies
- Discussion of benefits of AI technologies
- Analysis of ethical dilemmas in AI

Q4. Describe the components of a neural network. Explain how neural networks are used in AI applications.

[10 Marks | Difficulty: medium]

Expected Points:

- Explanation of neural network components (neurons, layers, activation functions)
- Overview of how neural networks process information
- Examples of AI applications that utilize neural networks

Q5. Evaluate the impact of AI on various industries. Provide specific examples of how AI is transforming sectors like healthcare, finance, and transportation.

[10 Marks | Difficulty: medium]

Expected Points:

- Analysis of AI's impact on industries
- Examples of AI applications in healthcare, finance, and transportation

- Discussion of benefits and challenges of AI adoption in different sectors
