

Assignment - Cloud

Course: 696a4ca230226533ef85ca20

| Due Date: 1/23/2026

Questions: 5 | Total Marks: 50

Type: Descriptive Questions

QUESTIONS:

Q1. Explain the concept of cloud computing and its significance in modern technology. Provide examples of popular cloud service providers.

[10 Marks | Difficulty: medium]

Expected Points:

- Definition of cloud computing
- Importance of cloud computing in technology
- Examples of popular cloud service providers (e.g., AWS, Azure, Google Cloud)

Q2. Discuss the key characteristics of cloud computing models such as IaaS, PaaS, and SaaS. Provide a detailed comparison of these models.

[10 Marks | Difficulty: medium]

Expected Points:

- Explanation of IaaS, PaaS, and SaaS
- Characteristics of each cloud computing model
- Comparison of IaaS, PaaS, and SaaS based on features and use cases

Q3. Describe the essential components of a cloud infrastructure. Explain the role of virtualization, scalability, and security in cloud environments.

[10 Marks | Difficulty: medium]

Expected Points:

- Components of cloud infrastructure (e.g., servers, storage, networking)
- Importance of virtualization in cloud computing
- Scalability considerations in cloud environments
- Security measures in cloud computing

Q4. Explore the benefits and challenges of migrating to the cloud for businesses. Provide real-world examples of successful cloud migration projects.

[10 Marks | Difficulty: medium]

Expected Points:

- Advantages of cloud migration for businesses
- Challenges faced during cloud migration
- Case studies of successful cloud migration projects

Q5. Examine the concept of hybrid cloud and its advantages in enterprise environments. Compare hybrid cloud with public and private cloud models.

[10 Marks | Difficulty: medium]

Expected Points:

- Definition and benefits of hybrid cloud
- Advantages of hybrid cloud in enterprise settings
- Comparison of hybrid cloud with public and private cloud models
