

Assignment - AI

Course: 696a728da8f2fbaea28e5dcf

| Due Date: 1/23/2026

Questions: 5 | Total Marks: 50

Type: Descriptive Questions

QUESTIONS:

Q1. Explain the concept of machine learning in the context of AI. Provide examples to illustrate your explanation.

[10 Marks | Difficulty: medium]

Expected Points:

- Definition of machine learning
- Explanation of its role in AI
- Examples of machine learning applications in AI

Q2. Discuss the difference between narrow AI and general AI. How do they impact different industries?

[10 Marks | Difficulty: medium]

Expected Points:

- Definition and characteristics of narrow AI
- Definition and characteristics of general AI
- Comparison of their applications in various industries

Q3. Describe the importance of neural networks in artificial intelligence. How do neural networks mimic the human brain?

[10 Marks | Difficulty: medium]

Expected Points:

- Explanation of neural networks in AI
- Role of neural networks in AI tasks
- Comparison of neural networks to the human brain

Q4. Explain the concept of natural language processing (NLP) in AI. How is NLP used in real-world applications?

[10 Marks | Difficulty: medium]

Expected Points:

- Definition and components of NLP
- Examples of NLP applications in AI
- Impact of NLP on communication and technology

Q5. Discuss the ethical considerations surrounding the development and use of AI technologies. Provide examples of ethical dilemmas in AI.

[10 Marks | Difficulty: medium]

Expected Points:

- Explanation of ethical issues in AI development and deployment
- Discussion on potential biases in AI algorithms
- Examples of ethical dilemmas in AI applications
