

Assignment - AI

Course: 696a856802c34352d7e9f9f0

| Due Date: 1/23/2026

Questions: 5 | Total Marks: 50

Type: Descriptive Questions

QUESTIONS:

Q1. Explain the concept of machine learning and its significance in AI. Provide examples to illustrate your explanation.

[10 Marks | Difficulty: medium]

Expected Points:

- Definition of machine learning
- Explanation of its significance in AI
- Examples of machine learning applications in AI

Q2. Discuss the difference between narrow AI and general AI. Provide real-world examples for each type.

[10 Marks | Difficulty: medium]

Expected Points:

- Definition and characteristics of narrow AI
- Definition and characteristics of general AI
- Real-world examples of narrow AI
- Real-world examples of general AI

Q3. Examine the ethical considerations in AI development and deployment. How can these ethical challenges be addressed?

[10 Marks | Difficulty: medium]

Expected Points:

- Identification of ethical considerations in AI
- Discussion on the impact of these challenges
- Strategies to address ethical challenges in AI

Q4. Describe the difference between supervised learning and unsupervised learning in AI. Provide examples to clarify each type.

[10 Marks | Difficulty: medium]

Expected Points:

- Explanation of supervised learning
- Explanation of unsupervised learning
- Examples of supervised learning applications
- Examples of unsupervised learning applications

Q5. Explain the concept of neural networks and their role in AI. How do neural networks mimic the human brain in processing information?

[10 Marks | Difficulty: medium]

Expected Points:

- Definition of neural networks
- Explanation of their role in AI

- Discussion on how neural networks mimic the human brain
- Illustrative examples of neural networks in AI
