

Assignment - AI

Course: 696a9224009abdace012e29d

| Due Date: 1/23/2026

Questions: 5 | Total Marks: 50

Type: Descriptive Questions

QUESTIONS:

Q1. Explain the concept of machine learning in the context of AI. Provide examples of machine learning applications.

[10 Marks | Difficulty: medium]

Expected Points:

- Definition of machine learning in AI
- Explanation of examples of machine learning applications
- Importance of machine learning in AI

Q2. Discuss the difference between narrow AI and general AI. How do they impact various industries differently?

[10 Marks | Difficulty: medium]

Expected Points:

- Definition and characteristics of narrow AI
- Definition and characteristics of general AI
- Comparison of their impact on industries

Q3. Examine the ethical considerations in the development and deployment of AI technologies. Provide real-world examples of ethical dilemmas in AI.

[10 Marks | Difficulty: medium]

Expected Points:

- Discussion on ethical considerations in AI
- Analysis of real-world examples of ethical dilemmas in AI
- Proposed solutions to address ethical challenges in AI

Q4. Describe the role of neural networks in artificial intelligence. How do neural networks mimic the human brain in problem-solving?

[10 Marks | Difficulty: medium]

Expected Points:

- Explanation of neural networks in AI
- Comparison of neural networks with the human brain in problem-solving
- Advantages and limitations of neural networks in AI

Q5. Explore the challenges and limitations of AI technology. How can these challenges be addressed to ensure responsible AI development?

[10 Marks | Difficulty: medium]

Expected Points:

- Identification of challenges and limitations in AI technology
- Discussion on strategies to address challenges in AI development
- Importance of responsible AI practices
